ABSTRACT

In 1991, a survey was conducted of the 1,301 students who graduated from the Community College of Rhode Island (CCRI) in 1990 to identify the educational goals and career directions of CCRI graduates; to gather information about the employment status and salary ranges of graduates who elected full-time employment; and to identify colleges and universities chosen by those who went on to continue their education on a full-time basis. Study findings based on responses from 993 graduates included the following: (1) 55% of the graduates were employed full time, including 116 graduates who were also attending school part time; (2) 10.2% were employed part time; (3) 1.9% were unavailable for employment, and 2.9% were unemployed and seeking employment; and (4) 30% were attending school full time, including 137 graduates who were concurrently employed part time. The study report presents placement and transfer data on graduates of each of CCRI's 25 programs, including for each program the number of 1990 graduates; the number of survey respondents; a profile of responding graduates working in their fields of concentration, including the average salary, the salary range, positions and employers; and a profile of responding graduates continuing their education full time, by major and institution. Appendixes provide a list of CCRI programs and concentrations, the survey instrument, and a comparison of 1988, 1989, and 1990 graduates. (JMC)

Community College of Rhode Island

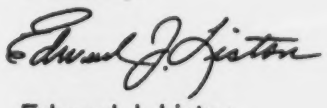
REPORT ON CAREER PLACEMENT AND EXTERNAL TRANSFER OF 1990 GRADUATES

A Message from the President

The Report on Career Placement and External Transfer of 1990 Graduates is used to identify the educational goals and career directions of Community College of Rhode Island graduates. It provides information about the employment status and salary ranges of those graduates who elected full-time employment as well as a listing of colleges and universities chosen by those who went on to continue their education on a full-time basis.

The information provided in this report helps us in advising current students as well as in our recruitment of prospective students. This report is also a valuable resource for guidance counselors in secondary schools throughout the state, for businesses and industries that are potential employers of our graduates, and most importantly for students and parents to use as an educational and career decision-making aid. The Community College is proud of its placement and transfer record. I'm sure that you will find the information contained in this report impressive as well as useful.

Sincerely,



Edward J. Liston

In order to obtain information contained in this report, a survey was conducted by the Office of Career Services on a continuous basis from January, 1991 through May, 1991. A questionnaire was mailed to all 1990 graduates. The initial response rate was 35 percent. A follow-up telephone survey produced an additional yield of 41 percent, for a total of 76 percent responding. A sample of the questionnaire used is contained in Appendix B of this report. A summation of the survey results shows that 55 percent of the graduates are employed full-time and 30 percent are continuing their education full-time, 1.9 percent are unavailable for employment and 2.9 percent of the graduates continue to seek employment. Average salaries, based on a 40 hour week, are indicated for each program. A further breakdown of these statistics can be found within the report.
